

College of Business Administration
APPLIED INVESTMENT MANAGEMENT (AIM) and ACCOUNTING MAJOR
Program Description

BACKGROUND: Marquette is home to one of the nation's top undergraduate programs in applied investment management. The AIM program allows a select group of finance majors to get hands-on academic and security analysis experience, including summer internships, and an opportunity to actively manage equity (domestic and international) and fixed-income portfolios throughout their senior year. Students will study the core body of knowledge covered in the Chartered Financial Analyst (CFA[®]) Level I exam – preparing them to take the test upon graduation – and begin a career in the money management industry. It is possible for students to dual major in Accounting and Finance. Many AIM students combining the two majors have been able to accumulate the 150-hour educational requirements of Wisconsin, Illinois and the American Institute of Certified Public Accountants.

COURSES: In addition to the regular finance and accounting courses, there are four unique AIM courses:

- **Introduction to Applied Investment Management** covers investment policy, securities regulation, and the mechanics of the securities markets and is intended to prepare students for their summer internship.
- **Research and Financial Analysis** provides students a thorough understanding of the key investment tools – quantitative research methods, economic relationships, and financial statement analysis. During this course students will analyze securities and manage actual equity and fixed income portfolios.
- **Valuation and Portfolio Management** includes the common approaches to valuing assets, the basic measurements of risk and return, and the key elements of the portfolio management process. Students will continue to manage the investment portfolios, evaluate performance, and prepare reports on the results at the end of the semester.
- **Investment Management, Ethics, and Society** emphasizes how to manage investments in a manner that is both ethical and socially responsible. Students will acquire a thorough understanding of the CFA[®] professional standards of conduct in the application of ethics to the moral dimensions of money management.

REQUIRED INTERNSHIP: Students accepted into the AIM program are expected to complete a summer internship between their junior and senior years. While possible, students should understand that it will be difficult to study abroad during their junior or senior years while enrolled in AIM. Also, given the required AIM and accounting courses, it will be difficult for students to obtain a triple major in business in four years.

APPLICATION TO THE AIM PROGRAM: Students apply to the AIM program during the fall semester of their junior year (while enrolled in FINA 3001 and ACCO 3001) and notification of acceptance occurs before the end of the fall semester. If at anytime a student leaves or is dropped from the program, all credits earned at that point will be counted towards the finance major. Acceptance into the program will be based on:

- Resume & References
- Interview
- Declared Finance major
- Application Essay
- Grades earned by the beginning of the fall semester of the junior year (GPA \geq 3.0)

Interviews for the summer internships will begin after acceptance into the AIM program.
